Research article

Segmental concatenation of individual signatures and context cues in banded mongoose (*Mungos mungo*) close calls

David AWAM Jansen, Michael A Cant and Marta B Manser

BMC Biology

Mr Jansen,

We apologise for the delay in the copyediting of your manuscript and any inconvenience this may have caused.

Please find attached the proofs of your manuscript (tex and rendered PDF), which have been copyedited for clarity and style.

Please read through the proofs and proceed as follows:

- During copyediting your manuscript may have been reworded in places; if errors have been introduced or the intended meaning altered, please make corrections.
- Please check the manuscript carefully for any typographical errors as this is the final proofing stage.
- Please return this file with your corrections, do not send a whole new version.

Please note, once the document has been returned, it will be **too late to make any changes** to your manuscript, so please read the text thoroughly.

I am also attaching the figure proofs for your approval. If your figures require any corrections then please provide the corrected figures when possible.

Once you have thoroughly checked the edited version, **please return your corrections by email to me as soon as possible as we hope to publish today**.

Kind regards,

Lee Kettley

To: Marta Manser <marta.manser@ieu.uzh.ch>, Michael Cant <M.A.Cant@exeter.ac.uk>

Dear Mike and Marta,

please find attached the proofs and email of BMC biology below.

If we send back today it will be published today.

Please let me know asap if you have time to look at it today and if not if you are ok with me checking and sending files back.

Greets David

To: "Kettley, Lee, BioMed Central Ltd." <Lee.Kettley@biomedcentral.com>

Dear Lee Kettley,

thanks for the proofs. I was just wondering if it is correct that in the proofs tables and figures legends are still at the back of the paper and not in-bedded in the text.

Also I am slightly confused regarding where I have to make changes. Should I make them directly in the tex file or should I indicate in an email what should be changed?

Thanks in advance and greetings,

David

To: David Jansen <david.awam.jansen@gmail.com>

Dear Mr Jansen,

Any changes can be made directly to the tex file. The tables and figure legends are placed after the reference list in the provisionally published PDF. They will be moved into their final positions in the final version PDF.

Kind regards,

Lee Kettley

Dear Lee Kettley,

please find attached the tex file with final changes.

I only found a few small mistakes/typos. I have made the changes in the tex file.

For clarity I will indicate the changes below.

Page 3 par 2

latin names of red deer and fallow deer where missing. I have added them.

Page 3 par 3

latin name of fallow deer in this could be removed because of above.

Page 6 par 1

I added "in an animal vocalisation" to the sentence that starts with To our knowledge

Page 6 par 2

I changed the quotation marks around syntactic from double ones to single ones to be consistent with rest of paper

Page 6 par 2

I changed core component to "core feature" to avoid the double use of component in same sentence

Pag 9 Recording methods

A added a . to the last Inc

I hope it is all clear and fine now.

Thanks for your help.

Hoping I am still in time for publication today.

Greetings David
